Objective

Data Science and Machine Learning practitioner skilled in Python, SQL, and advanced ML/DL libraries. Experienced in exploratory data analysis (EDA), predictive modeling, fraud detection, and building interactive BI dashboards. Dedicated to extracting actionable insights from data and engineering scalable, production-ready analytical solutions.

Education

Gramaudyogik Shikshan Mandal Maharashtra Institute of Technology (MIT) <i>B.Tech in Artificial Intelligence & Data Science – CGPA: 7.63</i>	Chh. Sambhajinagar, India 2022 – 2026
Shreeram Junior College <i>12th Grade – Percentage: 73.83%</i>	Beed, India 2021 – 2022

Experience

Data Science Intern <i>Main Flow Services & Technologies Pvt. Ltd.</i> - Performed exploratory data analysis (EDA) on real-world datasets using Pandas, NumPy, Matplotlib, and Seaborn to uncover patterns, trends, and actionable insights. - Built and evaluated supervised machine learning models (Linear Regression, Decision Tree, Random Forest) with feature engineering, data preprocessing, and hyperparameter tuning. - Developed interactive dashboards and stakeholder reports, gaining end-to-end experience across data collection, modeling, evaluation, and deployment readiness.	Jan 2026 – May 2026
--	---------------------

Projects

Fraud Detection ML Model Live Demo - Analyzed 6.3M+ financial transactions and engineered fraud-related features to identify suspicious transaction patterns. - Implemented Logistic Regression, Random Forest, and XGBoost models, achieving 99%+ classification accuracy and 87% recall for fraud detection. - Reduced missed fraud cases to only 26 transactions on a 150K-record test dataset through model optimization and evaluation using Precision, Recall, F1-Score, and Confusion Matrix. - Deployed a production-ready ML application using FastAPI, Scikit-Learn, Render, and Vercel for real-time fraud prediction and monitoring.	2026
Live Weather Forecasting Dashboard - Created an interactive dashboard using real-time weather APIs with automated data refresh in Power BI. - Implemented ETL pipelines and time-series analysis to deliver actionable, up-to-date forecasting insights.	2024
NGO Donation Website - Developed a responsive website with secure payment gateway integration using React.js. - Implemented dynamic UI components and user authentication for a seamless donor experience.	2025

Technical Skills

Programming: Python, SQL, C
ML / AI: Machine Learning, Deep Learning, NLP, Computer Vision, Data Mining
Data Tools: Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib, Seaborn
Databases: MySQL, MongoDB
IT Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Computer Networks, Operating Systems
Other Skills: Data Cleaning, EDA, Dashboarding, Problem Solving, Teamwork

Certifications

Google Data Analytics Professional Certificate — Coursera (Google), 2025
SQL Basics to Advanced — Geekster, 2024
Foundations of Cybersecurity — Coursera (Google), 2024
Google Cloud Computing Foundations and Generative AI — Google, 2023

Extra-Curricular Activities

Student Association Member <i>Ignite Student Association</i> - Organized online gaming events, coding competitions, and cultural programs for the student community. - Developed leadership, communication, and event management skills through cross-team coordination.	June 2024 – June 2025
